Title: *Book Bloom.*

Project Idea: *online library system for buying and borrowing books, and for organizing work between the manager and employee.*

Functional Requirements:

Add books, manage users (add), Manage employees, Borrow, Buy Books, Deadline for return books, Add to Wishlist, Login, Signup, Payment, Manage Employees, View book info, View Personal Info, Categories.

Goal: *helping users access library services, while also helping employees and the manager organize books, users, and daily operations in a simpler and more efficient way.*

In-Scope: - *Buy, borrow and some features for the staff.*

Out-of-Scope: - *No AI, No chat between users and no more than one language for the site.*

Stakeholders: - *Manager , Employees & Users.*

Software Model: -**Agile** *because its fast adaptation to change , It doesn't require clear requirements.*
